

	<b>QUALITY POLICY, ENVIRONMENT AND OCCUPATIONAL RISK PREVENTION</b>	Rev nº 13 Date: 12/11/20  Page: 1 out of 1
---	---	---

APLI PAPER S.A.U. is a company dedicated to the label Design, Manufacture and Commerce, as well as other self-adhesive products, such as office, educational and school products, whose main objective is to obtain the satisfaction and trust of Customers, which allow us to ensure continuity as a Company.

Safety, Quality, and respect for the environment in the manufacturing processes of our products and services, are the means by which we want to achieve our main objective, as well as achieve prestige within our sector and in the business world in general. Therefore, we comply with the requirements of an Integrated Quality and Environment Management System, based on the STANDARDS UNE-EN-ISO 9001 and UNE-EN-ISO 14001, whose objectives we measure to continuously improve the efficiency of the System.

Our basic principles are:

- Make rational use of natural resources, complying with the requirements established in the certifications FSC® chain of custody and PEFC™ in our main raw materials.
- Always be aware and know the needs and expectations of our Customers to obtain their maximum satisfaction.
- Comply with the legislation and regulations in force in the field of environmental protection and conservation and prevention of occupational risks, as well as the applicable requirements.
- Establish methods of continuous improvement, use of resources, minimization of waste, prevention of pollution and protection of health and safety of personnel.
- Establish objectives aligned with strategic direction, taking into account, context and stakeholders.
- Promote process focus and risk-based thinking, to make a preventive system that allows us to detect new opportunities.
- Continuous improvement in the achievement of costs adjusted as a basis for the internationalization of our activity, without compromising the safety and health of the staff.
- Continuous innovation and adaptation to new technologies and information systems whose implementation is economically viable.
- Maintenance and improvement of the integrated management System, in order to continue to evolve and remain competitive and leaders in our Market.

The preventive activity of the company, which is integrated within the organizational structure of the company, is focused on:

- Avoid risks and assess those which cannot be avoided, combating the risks at source.
- Adapt work to the person, in particular, regarding the conception of jobs, as well as to the choice of equipment and working and production methods, with a view, in particular, to attenuate monotonous and repetitive work and to reduce the health effects of work.
- Consider the technique evolution and replace what may expose a danger so that it entails little or none.
- Plan prevention, seeking a coherent set that integrates in it the technique, organization and work conditions, social relations, and the influence of environmental factors on work.
- Take measures that prioritize collective protection over individual protection.

The main resource of APLI PAPER S.A.U. is the Staff that collaborates in the Company. For this reason, awareness, motivation, and active participation in our objectives is essential. To this end, the Company provides staff with the necessary training and information, on an ongoing basis, so that it can carry out its task appropriately in the quality field of our products, in the protection of the environment and in the Prevention of Occupational Risks.

Pablo Perez  
Director General
